## WORK EXPERIENCE

---

### UBC LFS Learning Centre

#### Assistant Software Developer (Co-op)

Apr. 2019 – Nov. 2019

- Reworked Qualtrics API to allow UBC students to easily utilize survey software from the student portal.
- Wrote automated tests that detected numerous issues in a Lab Certification Tracker software right before deployment.
- Designed and implemented Front End for Teacher Assistant Application program.

### Canadian Web Hosting

#### Junior Web Developer (Co-op)

Apr. 2018 - Aug. 2018

- Collaborated with marketing team and other developers on the redesign of the company's website to attract new customers (candianwebhosting.com)
- Hands-on experience with React, Jade, and JavaScript.
- Canadian Web Hosting is the leader in Web and Cloud hosting in Canada.

## EDUCATION

---

### University of British Columbia

Sept. 2015 – May. 2020

- B.Sc. Double Major in Computer Science and Statistics

## PROJECTS

---

### Custom Bakery Marketplace (2020) ([Git](#))

- A platform that allows bakers to bake custom baked goods for special events.
- Utilizes React, MongoDB, Express.js
- My favorite aspect of the app is that bakers can customize how the bakery and products are displayed on the app.

### Submarine Wars (2019)

- 2D shooting game where the player defends their land from a submarine invasion.
- Designed an Entity Management System that allowed new entities to be added efficiently.
- This project was done entirely in C++ and DirectX without the use of Unity or other engines.

### Fantasy Basketball Team Picker (2018) ([Git](#))

- A program that picks a basketball Team base on projected points. (Daily Fantasy Sports)
- Python, NumPy, Django
- This app is able to handle and calculate a large amount of data to find a perfect team that fits within certain constraints

## Languages and Technologies

---

- JavaScript, React, Meteor, Python, SQL, Java
